

# A GLOBAL LEADER

## YOUR STRATEGIC PARTNER

### CUSTOM METAL STAMPING, TOOLING & ASSEMBLY

#### The Ramcel Difference

Ramcel is a leading producer of precision metal stampings for global industries. We specialize in producing high volume metal parts that are highly complex. Our expertise is second-to-none for parts that require precision engineering or have tight tolerances where quality assurance and safety are critical.

We keep pace with new techniques, new equipment, and new processes to meet the highest standards while providing the most cost-effective solutions.

#### Advanced Technology

In addition to precision process stamping, we are unique in integrating technology to inspect and fully control the manufacturing process.

Monitoring devices and vision sensors eliminate non-compliant items – delivering 100% compliance to meet standards for safety-critical parts.

#### Integrated Solutions

We leverage automated processes with robotic welding and automated, in-line assembly services to minimize costs and ensure the greatest level of efficiency and productivity for our customers.

## Innovation and Leadership

Ramcel Precision Stamping and Manufacturing delivers more than just high-quality metal precision components. We are also consistently investing in our business to stay ahead of the competition.

- We employ the best people.
- We acquire the best equipment.
- We invest in automation and technology.
- We partner with our customers to generate new ideas and innovation.
- We reverse engineer and improve upon existing designs.

Ramcel is not your ordinary supplier. We take a vested interest in our customers' success and partner with them to exceed their goals.

## Superior Quality Assurance

The Ramcel **ISO/TS Quality Management System (QMS)** is the foundation of our robust business systems and processes. We've achieved ISO/TS 16949:2009 certification for our performance in training, precision implementation, and auditing practices. It recognizes our focus on total customer satisfaction for quality and on-time delivery.

With state-of-the-art inspection equipment (including Optical CMM inspection), Ramcel can quickly review data and create easy to interpret quality reports. Our technology enables us to ensure the quality of our parts quickly and increase throughput.

## Driven

By integrating superior design, quality control, automation, and specialized services and processes, our customers enjoy the benefits of:

- Expert engineering in design and product development
- A single source supplier with a dedicated Project Manager
- Strategic Partnering in innovation and reverse engineering
- Comprehensive manufacturing, processing, and assembly
- Precision monitoring and quality assurance
- Fast completion of production and on-time delivery
- Competitive price and commitment to continued efficiency
